

MANUFACTURER'S DECLARATION OF CONFORMITY WITH PPWR REQUIREMENTS

Document number : PPWR-2026-052

Manufacturer's data

TOOLCO Sp. Z o.o.
ul. Komunalna 11
15-197 Białystok ,
NIP: 5423260998,
REGON: 365443683
KRS: 0000637923

Product identification

Product name Polipropylene buckle (PP)
(Z_PP_III/B)

Material: Polypropylene

Intended Use: Fastening, sealing, and
securing shipping packages

DECLARATION

Acting as the manufacturer of the product specified above, we hereby declare that the polipropylene buckle (PP) used for strapping, closing, and securing transport packaging has been designed, manufactured, and placed on the market in accordance with the requirements applicable to this type of product as set out in Regulation (EU) 2025/40 of the European Parliament and of the Council on packaging and packaging waste (PPWR).

1. Packaging Minimization

The manufacturer confirms that the product has been designed in accordance with the principle of minimizing the weight and quantity of the material used while maintaining the required functionality, mechanical strength, and safety of use.

2. Recycling and Circular Economy

The manufacturer confirms that the polipropylene buckle (PP) is made of polypropylene. A material that is widely recyclable and can be recovered through existing plastic waste recycling systems.

The product supports the principles of the circular economy by enabling the recovery and recycling of the raw material at the end of the product's service life.

3. Environmental Impact Reduction

The manufacturer declares that measures are taken to minimize the environmental impact of its activities, in particular by:

- Using the raw materials efficiently,
- Reducing the amount of production waste,
- Optimizing manufacturing processes,
- Supporting the recycling of materials,
- And continuously improving environmental performance.

4. Hazardous Substances

The manufacturer declares that the product complies with the applicable requirements concerning restrictions on the content of hazardous substances and heavy metals established for packaging and packaging components.

5. Sustainability

The manufacturer conducts its business in accordance with the principles of sustainable development, taking into account environmental, economic, and social aspects through the design, manufacturing, and supply of its product.

6. Technical documentation

The manufacturer maintains technical documentation demonstrating the material composition and functional performance of the product, including, in particular:

- Material specification,
- Manufacturing records,
- Declarations and technical documentation provided by material suppliers, and
- Information confirming the recyclability of the material used.

7. Confirmation of Compliance

Based on the assessment carried out and the available technical documentation, the manufacturer confirms that the product complies with the requirements applicable to this type of product with regard to:

- ☒ minimization of material usage
- ☒ recyclability
- ☒ efficient use of resources
- ☒ reduction of environmental impact
- ☒ support for the circular economy
- ☒ sustainability principles

FINAL DECLARATION

This declaration is issued under the sole responsibility of the manufacturer and shall remain valid until any design, material, or manufacturing changes are introduced that may affect the product's compliance with the requirements specified in this document..
